THE SECRET'S IN THE SCIENCE®

FOUR ENERGY SOURCES IN ONE PRODUCT

Energize 24® is an energy supplement containing four energy sources to provide 24 hours of readily available energy for the breeding ewe to help overcome an energy imbalance or crisis.

Acetoneamia, Ketosis, Pregnancy Taxaemia and Twin Lamb Disease are all names for a condition in sheep caused by the excessive breakdown of body fat to energy, resulting in production of excessive ketones and acetones.

In Twin Lamb Disease, an imbalance in carbohydrate supply and stress can lead to inadequate blood glucose levels for the ewe and the rapidly growing foetus. Ewes become dull and lethargic, can stop eating and quickly deteriorate if the imbalance is not addressed.

In these cases, Energize 24® can help the ewe overcome the energy crisis through its unique phased energy release. The addition of trace elements, vitamins and amino acids also provides nutritional support.

THE SCIENCE BEHIND FOUR DIFFERENT ENERGY SOURCES

Different energy sources are fermented at different rates in the rumen to release their energy. Feeding a supplement with four different energy sources ensures a phased release of energy and boosted blood glucose levels from 15 minutes to 24 hours after dosing.

PHASED ENERGY RELEASE OVER 24 HOURS
