ENERGY BOOST PLUS®

FOUR ENERGY SOURCES IN ONE, WITH CHELATED TRACE ELEMENTS AND VITAMINS

FOUR ENERGY SOURCES IN ONE PRODUCT

Energy Boost Plus® is an energy supplement containing four energy sources to provide 24 hours of readily available energy for weak calves.

Low blood glucose can result in loss of appetite, weakness and compromise the immune system leaving calves susceptible to infection.

Energy Boost Plus® is designed for weak calves or “downer cows” to provide a rapid source of energy to help them quickly recover.

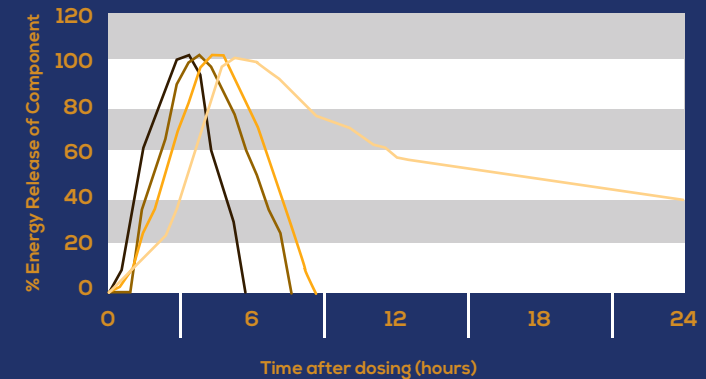

Calves with a blood sugar crisis or cows with acetonaemia will benefit from the instant and ongoing energy sources in Energy Boost Plus®.

THE SCIENCE BEHIND FOUR DIFFERENT ENERGY SOURCES

Different energy sources are fermented at different rates in the rumen to release their energy. Feeding a supplement with four different energy sources ensures a phased release of energy and boosted blood glucose levels from 15 minutes to 24 hours after dosing.

PHASED ENERGY RELEASE OVER 24 HOURS

...DON'T FORGET THE PLUS

The additional inclusion of chelated trace elements and vitamins stimulates the calf's appetite and immune system to help prevent recurrence of the problem.
