

" We saw a difference after 2 weeks.  
Calves had a noticeable change in thrive and rumen  
health, with a huge improvement in dung consistency.  
We find it a great help in preventing summer scour in  
the calves"

Farmer – Kieran Cummins, Grawn Dairy Limited

## MAXIMISE® CALF

- **Rumen function enhancer for calves** over six weeks of age to help stabilise the rumen pH and improve digestion.
- **MAXIMISE®** provides prebiotic yeast, minerals, vitamins and organic acids specifically for calves.
- "We find **MAXIMISE® CALF** very easy to administer on top of the calf nuts, especially when you're out anyway herding and feeding them" stated Kieran.
